Digital Inspection Software

 **safetime**[®]

 **safetime**[®]

Digital inspections since 2013

safetime® has revolutionised health & safety reporting by becoming a leader in digital inspections. Using a visual tagging system to supplement inspection reports is valuable to ensure the inspection has been carried out correctly and the asset is safe to use.

Although tagging systems are not a legal requirement, the law does require an inspection of temporary works and the issue of a report by a competent person every week. An **Inspect7®** device displays a visual 7-day countdown timer to ensure a weekly inspection of the works is never missed.

What is Inspect7?

Inspect7® is a digital solution that is revolutionising regular inspections in many industries. We ensure your weekly checks are carried out efficiently, competently and on time.

Bringing inspections into the 21st century

Inspect7® has revolutionised health & safety reporting by becoming a leader in digital inspections. Using a visual tagging system to supplement inspection reports is a valuable way of ensuring those using the equipment know that it has been inspected correctly and is safe to use.

The Inspect7 Device

Inspect7® is an electronic inspection device designed with collaboration in mind, ensuring everyone has access to the latest inspection information. The device displays a visual indication, notifying the user how many days until the next inspection. This critical information is displayed on the **Inspect7®** device, fixed to the equipment. As a result, safety is always maintained.

No Batteries to replace

The Inspect7® device is fully tamper-proof, and a battery indicator is displayed on the latest inspection.

Android & iOS compatible

The Inspect7® label is fully compatible with iPhone 7 onwards with iOS 13 and any NFC capable Android device.

Waterproof to IP63

The inspection device has been manufactured to withstand the most challenging conditions.

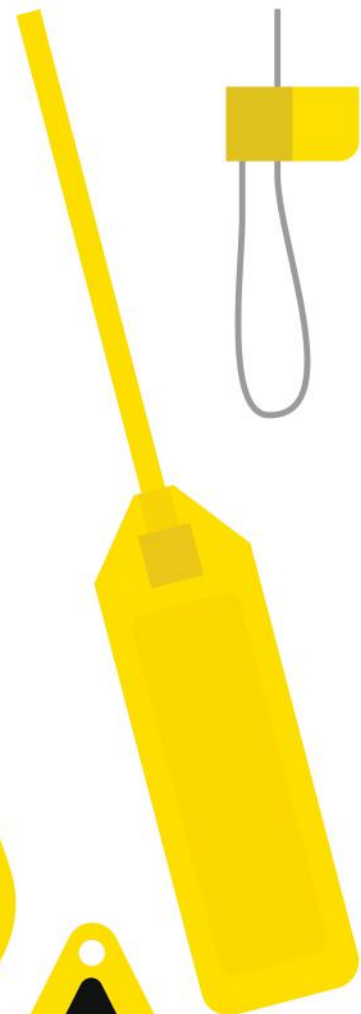

Visual indication

Notifies the user of how many days until the next inspection.

Hardware

Inspect7® has a wide range of products to suit your needs.

Inspect7 Label

The **Inspect7®** label is our new passive inspection system, which works the same way as our **Inspect7®** devices, but with no digital display. This makes it a considerably cheaper alternative whilst keeping all the benefits of the **Inspect7®** system. Available in Red/Yellow, Red/Green and Green/Yellow combinations. Compatible with Android and iOS.

Inspect7 Sticker, M Label & Keyfob

The **Inspect7®** Sticker is our new passive inspection system, which works the same way as our **Inspect7®** devices, but with no digital display. This makes it a considerably cheaper alternative whilst keeping all the benefits of the **Inspect7®** system; its smaller size and sticker backing means it's excellent for other inspections. Compatible with Android and iOS.

The **Inspect7®** Micro Label is our new passive inspection system, which works in the same way as our **Inspect7®** devices, but with no digital display. This makes it a considerably cheaper alternative whilst keeping all the benefits of the **Inspect7®** system; its smaller size means it's excellent for other inspections. Compatible with Android and iOS.

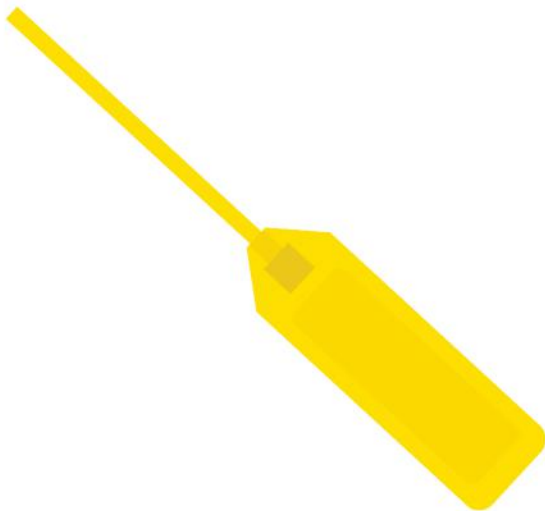

The **Inspect7®** keyfob is our new passive inspection system, which works the same way as our **Inspect7®** devices, but with no digital display. This makes it a considerably cheaper alternative whilst keeping all the benefits of the **Inspect7®** system; its smaller size means it's excellent for other inspections, such as vehicle inspections. Compatible with Android and iOS.

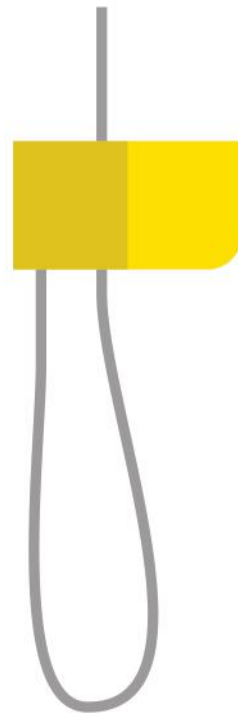

Inspect7 Tie & Asset

The **Inspect7®** ties are our new passive inspection system, which works the same way as our **Inspect7®** devices, but with no digital display. This makes it a considerably cheaper alternative whilst keeping all the benefits of the **Inspect7®** system; Its smaller size means it's excellent for other inspections, such as harness inspections. Compatible with Android and iOS.

The **Inspect7®** asset tag is our new passive inspection system, which works the same way as our **Inspect7®** devices, but with no digital display. This makes it a considerably cheaper alternative whilst keeping all the benefits of the **Inspect7®** system; Its smaller size means it's great for other types of inspections such as attaching to assets, including but not limited to small power tools. Compatible with Android and iOS.

Inspect7 Structural Tie

The **Inspect7®** Structural tie label is our new inspection label for structural ties. Compatible with Android and iOS.

Clik-it Backplate

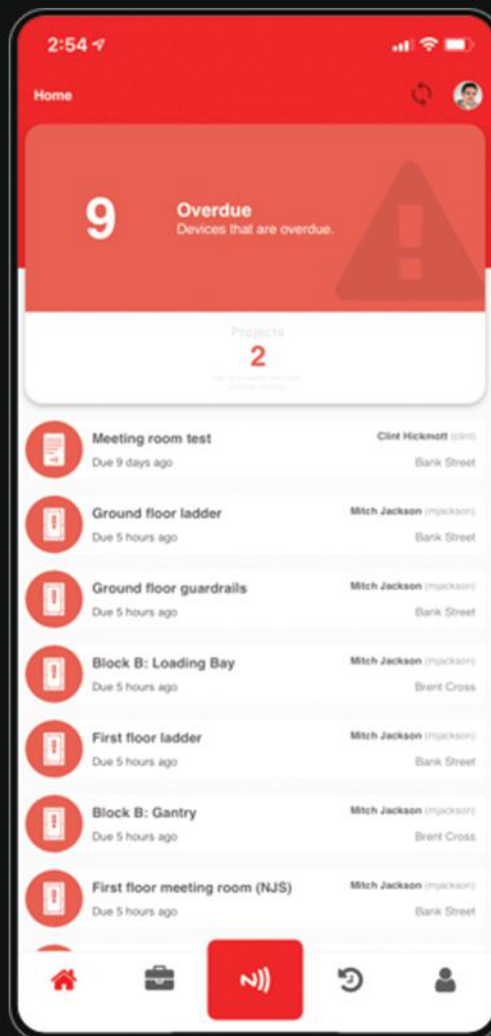

Clik-it® is a new device/ label holder product designed and produced by **safetime®**. Implementing 'QR' technology, **Clik-it®** works seamlessly with the **Inspect7®** device or label and portal, allowing the user, client or anyone involved with the equipment access to the crucial assignment information or to "pull the device" if the equipment becomes unsafe to use.

The Inspect7 App

For Android and iPhone

Download on the
App Store

GET IT ON
Google Play

*Requires an Android phone with NFC or iPhone 7 and up with iOS 13
